

## JOIN US!!

Come visit us during our weekly Saturday morning workshops and we will take you on a tour of our facility. We hope that you will like what you see and decide to become a member of our club.

Once you become a member, a knowledgeable NMC member will give you a stone slab to practice on, and will give you preliminary instruction on the use of machines.

As a member, we invite you to participate in all of our activities and encourage you to suggest new activities.

We welcome you to experience the rewards of the lapidary arts.

## NASSAU MINERAL CLUB

Lapidary ♦ Faceting  
Casting ♦ Wax Carving

MINERAL AND LAPIDARY SOCIETIES**

**AMERICA FEDERATION OF  
MINERALOGICAL & LAPIDARY SOCIETIES**

*50 Barry Drive, Glen Cove, NY*

**The Purpose of the Nassau Mineral Club is to further and promote interest in all phases of geology, mineralogy, gemology, paleontology and the lapidary arts.**

**We bring together people with similar interests for mutual enjoyment and development.**

The NASSAU MINERAL CLUB was founded over 50 years ago by employees of Sperry Corporation who were interested in the study of mineralogy. The club was later expanded to include non-Sperry employees interested in other fields of geology, such as preparing minerals for jewelry (lapidary).

Over the years, an impressive array of lapidary and faceting machines and other equipment was purchased. Social bonds were formed, as members worked together to mount exhibitions, take field trips, lecture to school and adult audiences, and share exciting specimen discoveries.

Today, the club has more than 80 multi-talented members from all walks of life, always willing to share knowledge. Our members are involved in everything from lapidary, cabochon making, faceting, chain making, wire wrapping, casting, silver work, beading, soldering, wax carving, enameling, mining and more.

Our motto is

***“Each one teach one!”***

**The Nassau Mineral Club meets every Saturday morning from 10 AM to 2 PM on the lower level of the beautiful Garvies Point Museum & Preserve, 50 Barry Drive, Glen Cove, New York.**

**Our facility is fully equipped to cut and polish rock slabs, make cabuchons, facet gems, make chains, cast in silver, as well as other techniques.**
